DEVICE & CALIBRATION INFORMATION

Our laboratory will calibrate the thermometer readout(s) and sensor(s) referenced below, at the specified test points per ICL Procedure 04 or 05 depending on the sophistication of the device. Your instrument(s) will be subjected to the specified series of calibration temperatures to obtain 'As Found' readings (if device is in operable condition upon receipt). If the adjustment threshold (70% of tolerance) is exceeded at any temperature, we will perform and adjustment to return the device to in-tolerance condition, when possible. If adjustment was required, subject the thermometer to all calibration temperatures to obtain 'As Left' calibration data. We will provide an ISO/IEC 17025 Accredited report of calibration, traceable to the SI through NIST, with As Found and As Left data, with measurement uncertainty, and detailing all the parameters of the calibration.

Please note that when statements of compliance are made, the uncertainty of the measurement shall be taken into account. It is the policy of this laboratory to use a guard band in the decision process which is designed to reduce the probability of a false acceptance (PFA), or false failure, to 2% or less. The method and equations used for the calculation of the guard band are as per method 6 of ANSI/NCSL Z540.3

Please check box as appropriate: **If the "Same as previous calibration" box is checked, no further test point information is required.**

RECALIBRATION INTERVAL (per the requirements of your quality system)

Please indicate the calibration interval you wish to appear on the calibration report:

- 1 YEAR**
- NONE** (if you do not wish to have a 'Next Due' date appear.)

If the interval is not indicated by the client, we will insert a 'reasonable and prudent' calibration interval taken from NIST or other authoritative body recommendations.

Note: if we know your recalibration interval, we will contact you approximately one month before the expiration of that interval to remind you recalibration will soon be due.

SAFETY INFORMATION

Have any of the devices submitted for calibration been exposed to radiation, bio-hazardous material or other hazardous contamination?

- No
- Yes *

* If yes, I hereby certify that these device(s) have been decontaminated by approved methods and are safe for handling.
